# NOTES

## ABOUT THIS PUBLICATION

This publication presents information about people aged 15 years and over who, within the 12 months to February 2012, either had a change of employer/business in their main job, or had some change in work with their current employer/business, for whom they had worked for one year or more.

The statistics in this publication were compiled from the Labour Mobility Survey, conducted throughout Australia in February 2012 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS).

## ROUNDING

As estimates have been rounded, discrepancies may occur between sums of the component items and totals.

## CONCEPTUAL FRAMEWORK

---

### LABOUR MOBILITY

The following diagram illustrates the conceptual framework for the 2012 Labour Mobility Survey. People aged 15 years and over were classified according to the duration of their employment with their employer/business at February 2012 into two key groups:

- those who had been with their current employer/business for less than 12 months;
- those who had been with their current employer/business for one year or more.

People who worked at February 2012, who had been with their current employer/business for less than 12 months, were asked whether they had changed their employer/business in the previous 12 months. Those who had changed employer/business were then asked if they had changed their occupation, industry, usual hours worked, or employment type, between their last and current employer/business.

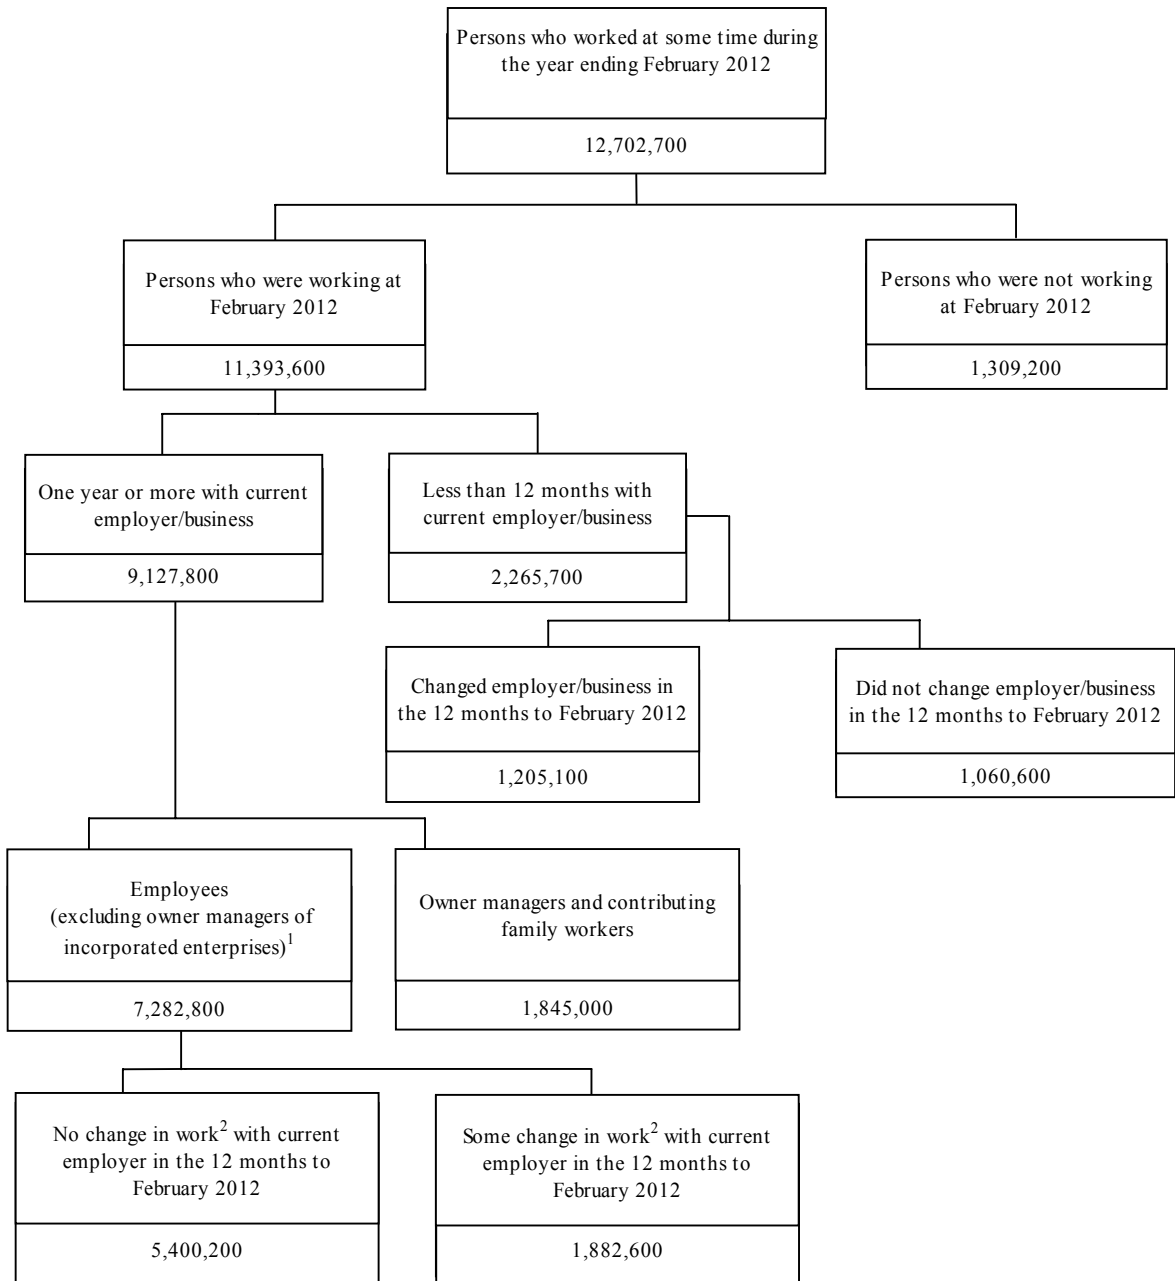

People who had not changed their employer/business in the 12 months ending February 2012, are comprised of those who were working with their employer/business at February 2012 for less than 12 months and reported they had not changed employer/business, and those who had worked with their employer/business at February 2012 for one year or more. Information about the latter group is presented separately.

Employees (excluding owner managers of incorporated enterprises)<sup>1</sup> who, at February 2012, had worked for their current employer/business for one year or more, were asked whether they had been promoted, transferred to a different position, changed occupation, or changed usual hours worked in the 12 months to February 2012.

Employees (excluding owner managers of incorporated enterprises)<sup>1</sup> who reported any of these changes, were considered to have had some change in work in the 12 months to February 2012.

Information was also collected from people who were not working at February 2012 who ceased a job in the previous 12 months.

**CONCEPTUAL FRAMEWORK** *continued*

END NOTES

1. Refer to the glossary definition 'Employment type' for further information.
2. Either promoted, transferred to a different position, changed usual hours worked or changed occupation. Refer to the glossary definition 'Change in work' for further information.

## SUMMARY OF FINDINGS

### OVERVIEW

An estimated 12.7 million persons aged 15 years and over had worked at some time during the year ending February 2012. Of these, 90% (11.4 million) were employed at February 2012, 5% were unemployed and a further 5% were not in the labour force. Of the 11.4 million persons who were working at February 2012, 80% (9.1 million) had been with their current employer/business for one year or more and 20% (2.3 million) had been with their current employer/business for less than 12 months. Other characteristics of persons who worked at some time during the year include:

- 54% (6.8 million) were males and 46% (5.9 million) were females;
- 18% were aged between 15 and 24 years, 65% were aged between 25 and 54 years and 17% were aged 55 years and over;
- 27% were born overseas; and
- 62% were married.

### PERSONS WHO WORKED AT SOME TIME DURING THE YEAR

### PERSONS WHO WORKED AT SOME TIME DURING THE YEAR ENDING FEBRUARY 2012, Age—By sex

The distribution of age groups, for persons who had worked at some time during the year ending February 2012, was similar for males and females. The most prevalent age groups being 25–34 years (representing 23% of males and 22% of females), 35–44 years (22% of both males and females) and 45–54 years (20% of males and 21% of females).

### PERSONS WORKING AT FEBRUARY 2012

There were 11.4 million persons aged 15 years and over who were working at February 2012. They comprised 10.2 million persons (89% of persons working at February 2012) who had not changed employer/business in the last 12 months and 1.2 million persons (11% of persons working at February 2012) who had changed their employer/business in the previous 12 months.

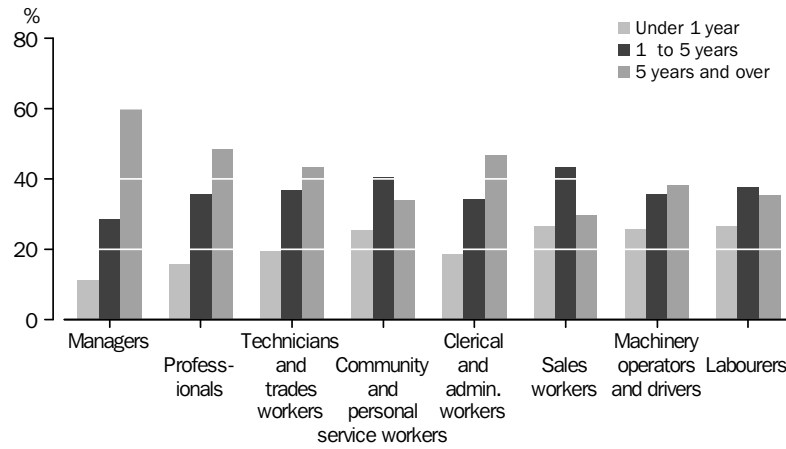

### *Duration with employer/business*

There were 2.3 million persons working at February 2012 who had been with their employer/business for less than 12 months, while 9.1 million persons had been working with the same employer/business for one year or more.

## SUMMARY OF FINDINGS *continued*

*Duration with employer/business continued*

PERSONS WORKING AT FEBRUARY 2012, Duration with employer/business—Occupation

Of those working at February 2012, the following occupation groups had the highest proportion of persons who had worked with their current employer for 5 years or more:

- Managers 60%;
- Professionals 49%; and
- Clerical and administrative workers 47%.

Persons working in these occupations were also least likely to have worked for their current employer/business for less than one year.

Proportionally more persons in the following occupation groups worked with their current employer for less than one year:

- Sales workers and Labourers (each 27%);
- Machinery operators and drivers 26%; and
- Community and personal service workers 25%.

There were 2.9 million persons who were working at February 2012 who had been with their current employer/business for 10 years or more. This represents 27% of males and 23% of females who were working at February 2012. Industry groups with the highest proportion of persons who had been with their current employer/business for 10 years or more were:

- Agriculture, forestry and fishing (54%);
- Education and training (35%);
- Public administration and safety (34%); and
- Manufacturing (30%).

## SUMMARY OF FINDINGS *continued*

*Working at February 2012 and have been with current employer/business for less than 12 months*

An estimated 2.3 million persons working at February 2012 had been with their current employer/business for less than 12 months.

Characteristics for these persons include:

- 29% were aged 25–34 years;
- 53% were males;
- 17% were Professionals, 15% were Technicians and trades workers, and 14% were Clerical and administrative workers;
- 13% worked in the Retail trade industry and 11% worked in the Accommodation and food services industry;
- 42% usually worked 35–40 hours per week and 20% usually worked 1–19 hours per week; and
- 42% were without a non-school qualification, while a further 19% held a Bachelor degree.

Of the 2.3 million persons working at February 2012 who had been with current employer/business for less than 12 months, 1.2 million persons (56% of males and 44% of females) changed employer/business in the last 12 months. Of these persons:

- 57% had changed industry Division;
- 42% had changed Major occupation group; and
- 73% had changed usual hours worked.

**PERSONS WORKING AT FEBRUARY 2012 AND HAVE BEEN WITH EMPLOYER/BUSINESS FOR LESS THAN 12 MONTHS, Changed employer/business in the last 12 months—By age**

Of those who had been with their employer/business for less than 12 months, a higher proportion of males in each age group reported a change in employer/business than females, except for those aged 15–19 years (23% of males and 36% of females) and those aged 60 and over (41% of males, 47% of females).

## SUMMARY OF FINDINGS *continued*

*Working at February 2012 and have been with current employer/business for less than 12 months continued*

For males working with their current employer/business at February 2012 for less than 12 months, the age groups where change in employer/business was most common were 35–44 years and 45–54 years (65% and 64% respectively). For females, the age groups where change in employer/business was most common were 55–59 years and 25–34 years (both 58%).

*Working at February 2012 and have been with their current employer/business for one year or more*

There were 9.1 million persons who were employed at February 2012 and had been with their current employer/business for one year or more. Characteristics for these persons include:

- 24% were aged 45–54 years;
- 55% were males;
- 23% were Professionals;
- 12% worked in the Health care and social assistance industry and 10% worked in the Retail trade industry;
- 23% usually worked 35–39 hours each week;
- 35% were without a non-school qualification;
- 21% held a Bachelor Degree; and
- 19% held a Certificate III/IV.

*Employees<sup>1</sup> who had a change in work*

There were 7.3 million employees<sup>1</sup> working at February 2012, who had been with their current employer for one year or more (52% were males and 48% were females). Approximately one quarter (26%) of these persons had experienced some change in work in the last 12 months, with 3% changing Major occupation group, 13% changing their usual hours worked, and 17% being promoted and/or transferred.

The age groups with the highest proportion of employees who reported a change in work, were those aged 25–34 years (31% of males and 36% of females) followed by the 20–24 year age group (30% of males and 34% of females). The most common occupation group for employees reporting a change in work for both genders was Managers (31% for males and 36% for females). The occupation group with the lowest proportion of males who reported a change in work was Machinery operators and drivers (16%) compared to Labourers for females (19%).

*Owner managers and contributing family workers who had a change in work*

There were 1.8 million owner managers and contributing family workers who were working at February 2012 and who had been working in their current business for one year or more. Of these, 260,600 persons (13% of males and 16% of females) had changed the hours they usually worked during the 12 months prior to February 2012.

## SUMMARY OF FINDINGS *continued*

---

### *Persons who ceased a job during the year*

Approximately 2.5 million persons (20% of those who worked at some time during the year) ceased a job during the same period. Over one third of these persons (37%), left their last job for involuntary reasons and the remaining 1.6 million persons (63%), left their last job voluntarily. The most common reasons, for persons who voluntarily left a job were:

- 20% (497,400) to obtain a better job or conditions or wanted a change, of whom 56% were males; and
- 14% (345,600) because of unsatisfactory work conditions, of whom 53% were females.

The most common reasons, for persons who involuntarily left a job were:

- 17% (422,900) because the job was temporary or seasonal; and
- 16% (389,600) were retrenched or their employer went out of business, of whom 62% were males.

### END NOTES

1. Excludes owner managers of incorporated enterprises (OMIEs) and contributing family workers.

## EXPLANATORY NOTES

### INTRODUCTION

**1** The statistics in this publication were compiled from data collected in the Labour Mobility Survey, conducted throughout Australia in February 2012 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Respondents to the LFS who fell within the scope of the supplementary survey were asked further questions.

**2** The publication *Labour Force, Australia* (cat. no. 6202.0) contains information about survey design, sample redesign, scope, coverage and population benchmarks relevant to the monthly LFS, which also apply to supplementary surveys. LFS also contains definitions of demographic and labour force characteristics, and information about telephone interviewing which are relevant to both the monthly LFS and supplementary surveys.

### CONCEPTS, SOURCES AND METHODS

**3** The conceptual framework used in Australia's LFS aligns closely with the standards and guidelines set out in Resolutions of the International Conference of Labour Statisticians. Descriptions of the underlying concepts and structure of Australia's labour force statistics, and the sources and methods used in compiling these estimates, are presented in *Labour Statistics: Concepts, Sources and Methods* (cat. no. 6102.0.55.001).

### SCOPE

**4** The scope of the LFS is restricted to persons aged 15 years and over and excludes the following people:

- members of the permanent defence forces;
- certain diplomatic personnel of overseas governments, customarily excluded from the Census and estimated population counts;
- overseas residents in Australia; and
- members of non-Australian defence forces (and their dependants).

**5** Students at boarding schools, patients in hospitals, residents of homes (e.g. retirement homes, homes for people with disabilities), and inmates of prisons are excluded from all supplementary surveys.

**6** This supplementary survey was conducted in both urban and rural areas in all states and territories, but excluded persons living in Indigenous communities in very remote parts of Australia.

### COVERAGE

**7** The estimates in this publication relate to persons covered by the survey in February 2012. In the LFS, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection in the survey. See *Labour Force, Australia* (cat. no. 6202.0) for more details.

### SAMPLE SIZE

**8** Supplementary surveys are not always conducted on the full LFS sample. Since August 1994 the sample for supplementary surveys has been restricted to no more than seven-eighths of the LFS sample.

**9** The initial sample for the February 2012 LFS consisted of 36,812 private dwelling households and special dwelling units. Of the 29,682 private dwelling households and special dwelling units that remained in the survey after sample loss (e.g. households selected in the survey which had no residents in scope for the LFS, vacant or derelict dwellings and dwellings under construction), approximately 28,117 or 94.7% fully responded to the Labour Mobility Survey. The number of completed interviews obtained from these private dwellings and special dwelling units (after taking into account scope and coverage exclusions) was 32,119.

## EXPLANATORY NOTES *continued*

### RELIABILITY OF THE ESTIMATES

- 10** Estimates in this publication are subject to sampling and non-sampling errors:
- Sampling error is the difference between the published estimate and the value that would have been produced if all dwellings had been included in the survey. For more information see the Technical Note.
  - Non-sampling errors are inaccuracies that occur because of imperfections in reporting by respondents and interviewers, and errors made in coding and processing data. These inaccuracies may occur in any enumeration, whether it be a full count or a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers and effective processing procedures.

### SEASONAL FACTORS

- 11** The estimates are based on information collected in the survey month (February) and, due to seasonal factors, may not be representative of other months of the year.

### CLASSIFICATIONS USED

- 12** Country of birth data are classified according to the *Standard Australian Classification of Countries (SACC), 2011* (cat. no. 1269.0).
- 13** From 2006, occupation data are classified according to the *ANZSCO — Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1, 2009* (cat. no. 1220.0). This classification replaced *ASCO — Australian Standard Classification of Occupations, Second Edition, 1997* (cat. no. 1220.0)
- 14** Also from 2006, industry data are classified according to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 (Revision 1.0)* (cat. no. 1292.0). This classification replaced the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (cat. no. 1292.0).
- 15** Educational attainment data are classified according to *Australian Standard Classification of Education (ASCED)* (cat. no. 1272.0).

### COMPARABILITY OF TIME SERIES

- 16** The Labour Force Survey estimates and estimates from the supplementary surveys, are calculated in such a way as to sum to independent estimates of the civilian population aged 15 years and over (population benchmarks). These population benchmarks are based on Estimated Resident Population (ERP) data. Generally, revisions are made to population benchmarks after each five-yearly Census of Population and Housing (Census), however revisions were made to the population benchmarks from July 2011, including those used for the 2012 Labour Mobility Survey, to reflect revisions to ERP. For more details on population benchmarks, see the Explanatory Notes in *Labour Force, Australia* (cat. no. 6202.0), and for details about the revisions made see the article in the September 2011 issue of *Labour Force, Australia* (cat. no. 6202.0).
- 17** The scope of the Labour Mobility Survey was expanded in February 2006 to include all people aged 15 years and over.
- 18** In 2008, the introduction of ANZSCO First Edition and ANZSIC 2006 meant that data relating to change in occupation and industry are not comparable with previous years. Consequently, time series data for 'Whether changed occupation (last to current employer/business)' and 'Whether changed industry (last to current employer/business)' was removed from the 2008 Table 1 and Table 12. In previous issues Table 2 presented time series data for 'Duration with current employer/business'. This information is now presented in Table 1. Users need to exercise care when comparing these estimates with publications prior to February 2008.

## EXPLANATORY NOTES *continued*

### COMPARABILITY OF TIME SERIES *continued*

**19** From 2008, data item 23, 'Whether changed occupation group (with current employer for one year or more)' is derived and output based on change at Major and Minor occupation levels. In previous years, this was derived and output based on change at any level. The following table compares estimates for data items 23a and 23b with how data item 23 was derived in 2006.

#### EMPLOYEES (EXCLUDING OMIES) WHO HAD BEEN WITH THEIR CURRENT EMPLOYER FOR ONE YEAR OR MORE, Whether changed occupation group—comparison of 2008 and 2006 methods

	2008 <i>data</i> <i>item</i> 23A Major level	2008 <i>data</i> <i>item</i> 23B Minor level	2008 <i>using the</i> <i>2006</i> <i>method</i> (any level)
	'000	'000	'000
<b>Whether changed occupation group (with current employer for one year or more)</b>			
Same occupation	6 174.8	6 102.7	5 990.1
Changed occupation	182.2	254.3	366.9
<b>Total</b>	<b>6 357.1</b>	<b>6 357.1</b>	<b>6 357.1</b>

**20** In 2008 and previous years, other data items relating to change in occupation and change in industry are derived and output based on change in Major occupation group and change in industry Division.

### COMPARABILITY WITH MONTHLY LFS STATISTICS

**21** Due to differences in the scope and sample size of this supplementary survey and that of the monthly LFS, the estimation procedure may lead to some small variations between labour force estimates from this survey and those from the LFS.

### PREVIOUS SURVEYS

**22** Similar surveys were conducted in November 1972, February 1975, February 1976 and annually from February 1979 to February 1992. Since then it has been conducted biennially. Results were published in *Labour Mobility, Australia* (cat. no. 6209.0).

### PREVIOUS REVISIONS TO HISTORICAL DATA

**23** Historical estimates of the number and proportion of people who were mobile in the labour market for the periods 1990 to 1996 were revised in the 1998 publication. Previously published estimates for reference periods from 1990 to 1996 will still contain incorrectly derived data. If you require further information about these revisions, please contact the National Information and Referral Service on 1300 135 070 or the Labour Market Section on (02) 6252 7206.

### NEXT SURVEY

**24** The ABS plans to collect labour mobility data again in February 2014. See *Information paper: Outcomes of the Labour Household Surveys Content Review, 2012* (cat. no. 6107.0) for more details.

### ACKNOWLEDGEMENT

**25** ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

## EXPLANATORY NOTES *continued*

### PRODUCTS AND SERVICES

*Confidentialised Unit Record  
File (CURF)*

**26** It is expected that a CURF will be produced from the Labour Mobility Survey subject to approval by the Australian Statistician. The Basic CURF will be available on CD-ROM, via the ABS Remote Access Data Laboratory (RADL) and the ABS Data Laboratory (ABSDL). The Expanded CURF will only be accessible through the RADL and ABSDL. The CURF will be available in SAS, STATA and SPSS format. A full range of up-to-date information about the availability of ABS CURFs and about applying for access to these is available via the ABS web site (see Services - CURF Microdata). For enquiries regarding CURFs, contact ABS CURF Management Unit via email at [microdata.access@abs.gov.au](mailto:microdata.access@abs.gov.au) or telephone (02) 6252 7714.

### RELATED PUBLICATIONS

**27** Other ABS publications which may be of interest include:

- *Australian Labour Market Statistics* (cat. no. 6105.0);
- *Labour Force, Australia* (cat. no. 6202.0);
- *Labour Force Experience, Australia* (cat. no. 6206.0);
- *Persons Not in the Labour Force, Australia* (cat. no. 6220.0);
- *Job Search Experience, Australia* (cat. no. 6222.0); and
- *Underemployed Workers, Australia* (cat. no. 6265.0).

**28** Current publications and other products released by the ABS are available from the Statistics Page on the ABS website. The ABS also issues a daily Release Advice on the website which details products to be released in the week ahead.

## APPENDIX 1 CLASSIFICATION OF EDUCATION

### CLASSIFICATION OF EDUCATION

In 2001, the *ABS Classification of Qualifications (ABSCQ)* (cat. no. 1262.0) was replaced by the *Australian Standard Classification of Education (ASCED)* (cat. no.1272.0). The ASCED is a national standard classification which can be applied to all sectors of the Australian education system including schools, vocational education and training and higher education. ASCED replaces a number of classifications previously used in administrative and statistical systems, including the ABSCQ. The ASCED comprises two classifications: Level of Education and Field of Education.

Level of Highest Educational Attainment can be derived from information on Highest Year of School Completed and Level of Highest Non-school Qualification. The derivation process determines which of the 'non-school' or 'school' attainments will be regarded as the highest. Usually the higher ranking attainment will be self-evident, but in some cases some Secondary Education is regarded, for the purposes of obtaining a single measure, as higher than some Certificate level attainments.

The following decision table is used to determine which of the responses to questions on Highest Year of School Completed (coded to ASCED Broad Level 6) and Level of Highest Non-school Qualification (coded to ASCED Broad Level 5) will be regarded as the highest. It is emphasised that this table was designed for the purpose of obtaining a single value for the output variable Level of Highest Educational Attainment and is not intended to convey any other order.

Decision Table: Level of Highest Educational Attainment							
ASCED LEVEL OF EDUCATION CODES	Certificate n.f.d. (500)	Certificate III or IV n.f.d. (510)	Certificate IV (511)	Certificate III (514)	Certificate I or II n.f.d. (520)	Certificate II (521)	Certificate I (524)
Secondary Education n.f.d. (600)	Certificate n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Certificate I or II n.f.d.	Certificate II	Certificate I
Senior Secondary Education n.f.d. (610)	Senior Secondary n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Senior Secondary n.f.d.	Senior Secondary n.f.d.	Senior Secondary n.f.d.
Year 12 (611)	Year 12	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Year 12	Year 12	Year 12
Year 11 (613)	Year 11	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Year 11	Year 11	Year 11
Junior Secondary Education n.f.d. (620)	Certificate n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Certificate I or II n.f.d.	Certificate II	Certificate I
Year 10 (621)	Year 10	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Year 10	Certificate II	Year 10
Year 9 (622)	Certificate n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Certificate I or II n.f.d.	Certificate II	Certificate I
Year 8 (623)	Certificate n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Certificate I or II n.f.d.	Certificate II	Certificate I
Year 7 (624)	Certificate n.f.d.	Certificate III or IV n.f.d.	Certificate IV	Certificate III	Certificate I or II n.f.d.	Certificate II	Certificate I

## APPENDIX 1 CLASSIFICATION OF EDUCATION *continued*

---

### CLASSIFICATION OF EDUCATION *continued*

The decision table is used to rank the information provided in a survey about the qualifications and attainments of a single individual. It does not represent any basis for comparison between differing qualifications. For example, a person whose Highest Year of School Completed was Year 12, and whose Level of Highest Non-school Qualification was a Certificate III, would have those responses crosschecked on the decision table and would as a result have their Level of Highest Educational Attainment output as Certificate III. However, if the same person answered 'Certificate' to the highest non-school qualification question, without offering any further detail, it would be crosschecked against Year 12 on the decision table as 'Certificate not further defined'. The output would then be 'Year 12'. The decision table, therefore, does not necessarily imply that one qualification is 'higher' than the other.

## APPENDIX 2 POPULATIONS AND DATA ITEMS LIST

---

### DATA AVAILABLE ON REQUEST

The ABS has a range of data available on request from the Labour Mobility Survey. This section lists the data items and populations which relate to the survey. More detailed breakdowns of some data items may also be available on request.

The population(s) for a particular data item refers to the persons in the survey to whom the data item relates.

For more information about ABS data available on request, contact Client Services Section in Canberra on (02) 6252 7400, or via email <[information.consultancy@abs.gov.au](mailto:information.consultancy@abs.gov.au)>.

<i>Population 1:</i>	Persons who worked at some time during the year ending February 2012
<i>Population 2:</i>	Persons who were working at February 2012
<i>Population 3:</i>	Employees (excluding owner managers of incorporated enterprises) who had worked with their current employer for one year or more
<i>Population 4:</i>	Persons who ceased a job during the year ending February 2012
<i>Population 5:</i>	Persons who ceased a job during the year ending February 2012 and were working at February 2012
<i>Population 6:</i>	Persons who were working at February 2011
<i>Population 7:</i>	Persons who were working at February 2011 and at February 2012
<i>Population 8:</i>	Persons who had worked with their employer/business at February 2012 for one year or more
<i>Population 9:</i>	Employees (excluding owner managers of incorporated enterprises) at February 2012 with paid leave entitlements
<i>Population 10:</i>	Employees (excluding owner managers of incorporated enterprises) at February 2012 without paid leave entitlements

## APPENDIX 3 SUPPLEMENTARY SURVEYS

### SUPPLEMENTARY SURVEYS

The Monthly Population Survey program and Multi-Purpose Household Survey program collect data on particular aspects of the labour force. The following is an historical list of labour surveys collected in these programs. Data from these surveys are available on request and can be obtained by contacting the ABS.

	<i>cat. no.</i>	<i>Frequency</i>	<i>Latest issue</i>
<b>Monthly Population Supplementary Surveys</b>			
Characteristics of Recent Migrants, Australia(a)	6250.0	Irregular	November 2010
Childhood Education and Care, Australia	4402.0	Irregular	June 2011
Child Employment, Australia	6211.0	Irregular	June 2006

(a) This product replaces the publication Labour Force Status and Other Characteristics of Recent Migrants, Australia (cat. no. 6250.0).

(b) Latest data available on request July 2001.

(c) This product replaces the publication Working Arrangements, Australia (cat. no. 6342.0).

INTRODUCTION

**1** Estimates in this publication are based on information obtained from occupants of a sample of dwellings, and are subject to sampling variability. That is, they may differ from those estimates that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of dwellings was included. There are about two chances in three (67%) that a sample estimate will differ by less than one SE from the number that would have been obtained if all dwellings had been included, and about 19 chances in 20 (95%) that the difference will be less than two SEs. Another measure of the likely difference is the relative standard error (RSE), which is obtained by expressing the SE as a percentage of the estimate.

**2** Due to space limitations, it is impractical to print the SE of each estimate in the publication. Instead, a table of SEs is provided to determine the SE for an estimate from the size of that estimate (see table T1). The SE table is derived from a mathematical model, referred to as the 'SE model', which is created using data from a number of past Labour Force Surveys. It should be noted that the SE model only gives an approximate value for the SE for any particular estimate, since there is some minor variation between SEs for different estimates of the same size.

CALCULATION OF STANDARD ERROR

**3** An example of the calculation and the use of SEs in relation to estimates of persons is as follows. Table 10 shows that 478,900 people involuntarily ceased a job during the year and their duration in that job was less than 12 months. Since this estimate is between 300,000 and 500,000, table T1 shows that the SE for Australia will lie between 6,650 and 8,350 and can be approximated by interpolation using the following general formula:

$$\begin{aligned}
 & SE \text{ of estimate} \\
 &= \text{lower SE} + \left( \left( \frac{\text{size of estimate} - \text{lower estimate}}{\text{upper estimate} - \text{lower estimate}} \right) \times (\text{upper SE} - \text{lower SE}) \right) \\
 &= 6,650 + \left( \left( \frac{478,900 - 300,000}{500,000 - 300,000} \right) \times (8,350 - 6,650) \right) \\
 &= 8,200 \text{ (rounded to the nearest 100)}
 \end{aligned}$$

**4** Therefore, there are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will fall within the range 470,700 to 487,100 and about 19 chances in 20 that the value will fall within the range 462,500 to 495,300. This example is illustrated in the following diagram.

**5** In general, the size of the SE increases as the size of the estimate increases. Conversely, the RSE decreases as the size of the estimate increases. Very small estimates are thus subject to such high RSEs that their value for most practical purposes is unreliable. In the tables in this publication, only estimates with RSEs of 25% or less are considered reliable for most purposes. Estimates with RSEs greater than 25% but less than or equal to 50% are preceded by an asterisk (e.g.\*3.2) to indicate they are subject to high SEs and should be used with caution. Estimates with RSEs of greater than 50%,

CALCULATION OF STANDARD  
ERROR *continued*

preceded by a double asterisk (e.g.\*\*0.3), are considered too unreliable for general use and should only be used to aggregate with other estimates to provide derived estimates with RSEs of less than 25%.

PROPORTIONS AND  
PERCENTAGES

**6** Proportions and percentages formed from the ratio of two estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. A formula to approximate the RSE of a proportion is given below. This formula is only valid when x is a subset of y.

$$RSE\left(\frac{x}{y}\right) = \sqrt{[RSE(x)]^2 - [RSE(y)]^2}$$

**7** Considering the previous example from table 10, of the 478,900 people who ceased a job involuntarily during the year ending February 2012, and their duration of last job was less than 12 months, 274,200 or 57.3% gave their reason as 'Job was temporary or seasonal'. The SE of 274,200 may be calculated by interpolation as 6,400. To convert this to an RSE we express the SE as a percentage of the estimate, or 6,400/274,200 = 2.3%. The SE for 478,900 was calculated previously as 8,200, which converted to an RSE 8,200/478,900=1.7%. Applying the above formula, the RSE of the proportion is:

$$RSE = \sqrt{(2.3)^2 - (1.7)^2} = 1.5\%$$

**8** Therefore, the SE for the proportion of people who reported their reason for ceasing their last job as 'Job was temporary or seasonal' and their duration of last job was less than 12 months is 0.9 percentage points (= (57.3/100)x1.5). Therefore, there are about two chances in three that the proportion of people who reported their reason for ceasing their last job as 'Job was temporary or seasonal' and their duration of last job was less than 12 months or more was between 56.4% and 58.2% and 19 chances in 20 that the proportion is within the range 55.5% to 59.1%.

DIFFERENCES

**9** Published estimates may also be used to calculate the difference between two survey estimates (of numbers or percentages). Such an estimate is subject to sampling error. The sampling error of the difference between two estimates depends on their SEs and the relationship (correlation) between them. An approximate SE of the difference between two estimates (x-y) may be calculated by the following formula:

$$SE(x-y) = \sqrt{[SE(x)]^2 + [SE(y)]^2}$$

**10** While this formula will only be exact for differences between separate and uncorrelated characteristics or sub populations, it is expected to provide a good approximation for all differences likely to be of interest in this publication.

#### T2 LEVELS AT WHICH ESTIMATES HAVE RELATIVE STANDARD ERRORS OF 25% AND 50%(a)

	NSW	Vic.	Qld	SA	WA	Tas.	NT	ACT	Aust.
	no.	no.	no.	no.	no.	no.	no.	no.	no.
Relative Standard Error (RSE) of 25%	6 300	5 400	5 100	2 600	3 500	1 400	1 100	1 400	6 800
Relative Standard Error (RSE) of 50%	2 000	1 800	1 700	800	1 200	500	300	600	1 600

(a) Refers to the number of people contributing to the estimate.

## GLOSSARY

<b>Born in Australia</b>	Includes persons born in Australia, Norfolk Island and Australian External Territories.
<b>Ceased a job voluntarily</b>	People who ceased a job voluntarily, because: <ul style="list-style-type: none"><li>■ of unsatisfactory work arrangements/pay/hours; or</li><li>■ the job was seasonal, temporary or a holiday job and they left that job to return to studies; or</li><li>■ they retired, started a new business, got a better job, left for family reasons.</li></ul>
<b>Ceased a job involuntarily</b>	People who ceased a job involuntarily, because: <ul style="list-style-type: none"><li>■ they were retrenched or their business closed down because of financial difficulties; or</li><li>■ the job was seasonal, temporary or a holiday job and they did not leave that job to return to studies; or</li><li>■ they left their job because of their own ill health or injury.</li></ul>
<b>Change in employer/business</b>	People who were employed at February 2012 and, within the 12 months to February 2012, ceased working with one employer/business and started working with another employer/business in relation to their main job.
<b>Change in employment type</b>	Any change in employment type in relation to main job.
<b>Change in industry Division</b>	Any change between industry Divisions as classified by the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat. no. 1292.0).
<b>Change in industry Subdivision</b>	Any change between industry Subdivisions as classified by the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat. no. 1292.0).
<b>Change in Major occupation group</b>	Any change between Major occupation groups as classified by the <i>Australian and New Zealand Standard Classification of Occupations, (ANZSCO), First Edition, Revision 1, 2009</i> (cat. no. 1220.0).
<b>Change in Minor occupation group</b>	Any change between Minor occupation groups as classified by the <i>Australian and New Zealand Standard Classification of Occupations, (ANZSCO), First Edition, Revision 1, 2009</i> (cat. no. 1220.0).
<b>Change in usual hours</b>	Any change in the number of usual hours worked in relation to main job.
<b>Change in work</b>	Employees (excluding owner managers of incorporated enterprises) were considered to have had some change in work if they had been with their current employer for one year or more at February 2012 and reported that, in the 12 months to February 2012, they had: <ul style="list-style-type: none"><li>■ been promoted;</li><li>■ transferred to a different position;</li><li>■ changed usual hours worked; or</li><li>■ changed occupation.</li></ul>
<b>Contributing family workers</b>	People who work without pay, in an economic enterprise operated by a relative.
<b>Current employer/business</b>	Refers to the employer/business which the person had in the week before the interview. Where the person had more than one employer/business, the employer/business for which most hours were usually worked, was regarded as the current employer/business.
<b>Did not change employer/business</b>	For this publication, mainly refers to people who were employed at February 2012 for less than 12 months, and did not work with a different employer/business in the previous 12 months. People who were working at February 2012 for one year or more could also be considered to have not changed employer/business, but are not included in data items in this survey.
<b>Different employment type</b>	See 'Change in employment type'.
<b>Different industry</b>	See 'Change in industry'.
<b>Different occupation</b>	See 'Change in occupation'.
<b>Different usual hours worked</b>	See 'Change in usual hours'.

## GLOSSARY *continued*

<b>Duration of last job</b>	The period from the commencement of the last job up to the time the person ceased working in that job.
<b>Duration with employer/business at February 2012</b>	The period between the commencement with the current employer/business and the week before the interview.
<b>Employed</b>	<p>People aged 15 years and over who, during the reference week:</p> <ul style="list-style-type: none"> <li>■ worked for one hour or more for pay, profit, commission or payment in kind, in a job or business or on a farm (comprising employees, employers and own account workers); or</li> <li>■ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or</li> <li>■ were employees who had a job but were not at work and were: <ul style="list-style-type: none"> <li>■ away from work for less than four weeks up to the end of the reference week; or</li> <li>■ away from work for more than four weeks up to the end of the reference week and received pay for some or all of the four week period to the end of the reference week; or</li> <li>■ away from work as a standard work or shift arrangement; or</li> <li>■ on strike or locked out; or</li> <li>■ on workers' compensation and expected to return to their job; or</li> </ul> </li> <li>■ were employers or own account workers who had a job, business of farm, but were not at work.</li> </ul>
<b>Employees</b>	<p>People who:</p> <ul style="list-style-type: none"> <li>■ worked for a public or private employer; and</li> <li>■ received remuneration in wages or salary; or are paid a retainer fee by their employer and worked on a commission basis, or for tips, piece-rates or payment in kind; or</li> <li>■ operated their own incorporated enterprise with or without hiring employees.</li> </ul>
<b>Employer/business at February 2012</b>	See 'Current employer/business'.
<b>Employers</b>	People who operate their own unincorporated economic enterprise or engage independently in a profession or trade, and hire one or more employees.
<b>Employment type</b>	<p>Classifies employed people according to the following categories on the basis of their main job (that is, the job in which they usually worked the most hours):</p> <ul style="list-style-type: none"> <li>■ Employees (excluding owner managers of incorporated enterprises); <ul style="list-style-type: none"> <li>■ with paid leave entitlements;</li> <li>■ without paid leave entitlements;</li> </ul> </li> <li>■ Owner managers of incorporated enterprises;</li> <li>■ Owner managers of unincorporated enterprises;</li> <li>■ Contributing family workers.</li> </ul>
<b>Full-time workers in main job</b>	Employed people who usually worked 35 hours or more a week (in their main job) and others who, although usually worked less than 35 hours a week, worked 35 hours or more during the reference week.
<b>Industry</b>	An industry is a group of businesses or organisations that undertake similar economic activities to produce goods and/or services. In this publication, industry refers to ANZSIC Division as classified according to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat. no. 1292.0).
<b>Last job</b>	The last job in which employment ceased during the reference period.
<b>Level of highest educational attainment</b>	Level of highest educational attainment identifies the highest achievement a person has attained in any area of study. It is not a measurement of the relative importance of different fields of study but a ranking of qualifications and other educational attainments regardless of the particular area of study or the type of institution in which the study was undertaken. See Appendix 1 for an explanation of how highest level is derived.

## GLOSSARY *continued*

<b>Level of highest non-school qualification</b>	Non-school qualifications are awarded for educational attainments other than those of pre-primary, primary or secondary education. They include qualifications at the Post Graduate Degree level, Master Degree level, Graduate Diploma and Graduate Certificate level, Bachelor Degree level, Advanced Diploma and Diploma level, and Certificates I, II, III and IV levels. Non-school qualifications may be attained concurrently with school qualifications.
<b>Main English-speaking countries</b>	The list of main English-speaking countries provided here is not an attempt to classify countries on the basis of whether or not English is the predominant or official language of each country. It is a list of the main countries from which Australia receives, or has received, significant numbers of overseas settlers who are likely to speak English. These countries comprise the United Kingdom, the Republic of Ireland, New Zealand, Canada, South Africa and the United States of America.
<b>Main job</b>	The job in which the most hours were usually worked.
<b>Not employed</b>	People who were either 'unemployed' or 'not in the labour force' as defined.
<b>Not in the labour force</b>	People who were not in the categories 'employed' or 'unemployed' as defined.
<b>Not working at February 2012</b>	See 'Not Employed'.
<b>Occupation</b>	An occupation is a collection of jobs that are sufficiently similar in their title and tasks, skill level and skill specialisation which are grouped together for the purposes of classification. In this publication occupation refers to Major Group as defined by ANZSCO— <i>Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1, 2009</i> (cat. no. 1220.0).
<b>Own account workers</b>	People who operated their own unincorporated economic enterprise or engaged independently in a profession or trade, and hired no employees.
<b>Owner managers</b>	People who work in their own business, with or without employees, whether or not the business is an incorporated enterprise. Comprises owner managers of incorporated enterprises and owner managers of unincorporated enterprises.
<b>Owner managers of incorporated enterprises (OMIEs)</b>	People who work in their own incorporated enterprise, that is, a business entity which is registered as a separate legal entity to its members or owners (may also be known as a limited liability company). These people are classified as employees under 'status in employment'.
<b>Owner managers of unincorporated enterprises (OMUEs)</b>	People who operated their own unincorporated enterprise, that is, a business entity in which the owner and the business are legally inseparable, so that the owner is liable for any business debts that are incurred. Includes those engaged independently in a trade or profession. These people are classified as employers under 'status in employment' if their business has employees, or own account workers if it does not.
<b>Part-time workers in main job</b>	Employed people who usually worked less than 35 hours a week (in their main job) and who did so during the reference week.
<b>Previous job</b>	See 'Last job'.
<b>Promoted</b>	A permanent increase in wage or salary and an increase in responsibility or complexity of work. Temporary promotions, acting and temporary higher duties are excluded.
<b>Reference period</b>	The 52 weeks up to the end of the week prior to interview.
<b>Reference week</b>	The week preceding the week in which the interview was conducted.
<b>Retrenched</b>	People who ceased their last job because they were either: <ul style="list-style-type: none"> <li>■ employees who were laid off, including no work available, made redundant, employer went out of business or dismissed; and</li> <li>■ self employed people whose business closed down for economic reasons, including 'went broke', liquidated, no work, or no supply or demand.</li> </ul>

## GLOSSARY *continued*

<b>Status in employment</b>	Employed people classified by whether they were employees, employers, own account workers, or contributing family workers.
<b>Transferred</b>	A change of position without a change in either the level of responsibility or wages or salary. Both employer-initiated and employee-initiated transfers are included.
<b>Unemployed</b>	People aged 15 years and over who were not employed during the reference week, and: <ul style="list-style-type: none"><li>■ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week and were available for work in the reference week; or</li><li>■ were waiting to start a new job within four weeks from the end of the reference week, and could have started in the reference week if the job had been available then.</li></ul>
<b>Usual hours worked</b>	The number of hours usually worked.
<b>With paid leave entitlements</b>	The entitlement of employees (excluding OMIEs) to either paid holiday leave or paid sick leave (or both) in their current job. People employed in their own business or who were contributing family workers were not asked questions about paid leave entitlements.
<b>Without paid leave entitlements</b>	Employees (excluding OMIEs) who were not entitled to paid holiday leave and paid sick leave, or did not know whether they were entitled to paid sick leave and paid holiday leave in their current job.
<b>Worked at some time during the year ending February 2012</b>	For practical reasons it was not possible to include all of the questions from the Labour Force Survey for previous periods. People who were either currently employed, or reported having worked for an employer or in their own business at some time in the previous year, were defined as having worked at some time during the year ending February 2012.
<b>Working at February 2011</b>	For practical reasons it was not possible to include all of the questions from the Labour Force Survey for previous periods. Therefore, people who reported that they had a job or business one year ago were defined as working at February 2011.
<b>Working at February 2012</b>	See 'Employed'.
